REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The combination of features in the independent claims 6 and 7 were not found in the prior art. Claims 6 and 7 both are to a system that is formed on a semiconductor substrate that comprises an electrically erasable non volatile program memory, central processing unit and control circuit. The processor operates in boot mode. The control circuits in claim 6 terminates erasing or programming of the data in the program memory in response to an interrupt request or an exception processing request during programming or erasing of the data in the program memory in boot mode while claim 7 the control circuit excludes an interrupt request or an exception processing request to the central processing unit during erasing or programming of data in the non-volatile program memory in accordance with a request for erasing or programming the data in the non-volatile program memory in boot mode . Claim 6 and 7 comprise wherein in the boot mode the data processor operates in part to input data from outside the semiconductor substrate for programming in the program memory. The prior art comprised programming of a electrically erasable or programmable program memory and either excluding an interrupt or terminating a process for erasing of programming of data in the program memory in response to an interrupt request or exception processing request. However this prior art operation was taught in a command or user program mode and not in a boot mode where the data processor was formed on a semiconductor substrate, operates in boot mode, wherein in the boot mode the data processor operates in part to input data from outside the semiconductor substrate for

programming in the program memory, and the data processor comprising a electrically erasable or programmable program memory, central processing unit and control circuit as claimed . Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
